

Shray Moza

Software Engineer | Data Analyst | Data Scientist

+1 902-809-3098 | shraya.moza@gmail.com | [in ShrayMoza](#)

EDUCATION

Master of Science, Applied Computer Science | *Dalhousie University, Halifax*

📅 Sep 2024 – Apr 2026

Bachelor of Technology, Computer Science | *Bharati Vidyapeeth's College of Engineering, Delhi*

📅 Aug 2016 – Aug 2020

TECHNICAL SKILLS

- **Languages:** C#, Java, SQL, JavaScript, TypeScript, Python
- **Frameworks & Web:** .NET, ASP.NET, Angular, React, Spring Boot, HTML/CSS
- **Databases:** MS SQL Server, Oracle, PostgreSQL, MongoDB
- **Cloud Platforms:** Microsoft Azure, Amazon Web Services (AWS)
- **Developer Tools:** Git, Docker, Kubernetes, Jenkins, Agile/Scrum Methodologies
- **Machine Learning :** TensorFlow, Scikit-learn, Pandas, NumPy, Predictive Modeling, Forecasting, Statistical Analysis

PROFESSIONAL EXPERIENCE

Software Engineer

Decimal Technologies Pvt. Ltd., Delhi, India

📅 May 2022 – Aug 2024

- Developed and maintained full-stack web applications for enterprise clients using a tech stack of **C#, .NET, Angular**, and **MS SQL Server**.
- Designed and deployed scalable microservices on Microsoft **Azure**, participating in the complete **SDLC** from requirements gathering with clients to **CI/CD** pipeline management.
- Collaborated in an **Agile** team to troubleshoot complex bugs, perform peer code reviews, and write comprehensive technical documentation to ensure solution quality and maintainability.
- Contributed to a legacy system modernization project, utilizing **Java** and **PostgreSQL** to refactor backend services and improve data processing efficiency

Associate Software Engineer

Decimal Technologies Pvt. Ltd., Delhi, India

📅 Aug 2020 – May 2022

- Led the end-to-end migration of a legacy enterprise **Android** application from **Java** to a modern, high-performance stack using **Kotlin** and **Flutter**, which improved feature development efficiency by 30%.
- Designed and developed production-ready, scalable RESTful microservices using **Java** and **Spring**, supporting critical financial services like real-time **KYC verification**.

PROJECTS

Best3Deals (Product aggregator):

- Developed mobile app using Kotlin, Spring boot, Flutter and MongoDB for finding the best three deals based on a filter in your search radius for a product utilizing a web scrapper and google products API.

EventSparks (Event Booking Platform):

- Built a full-stack event management web application from scratch using **React, MongoDB, S3, NodeJS**, and **Express**, showcasing end-to-end web development and RESTful API experience.

DalScooter (Serverless E-Scooter Platform):

- Built a fully **server-less** platform on AWS using **Amplify, Lambda, DynamoDB, Terraform, Cognito, Lex, SNS** and **SQS**, showcasing familiarity with cloud platforms and containerized environments.

Human and AI-Text Classifier:

- Demonstrated expertise in machine learning by developing and training a **DistilBERT**-based classifier trained on **10 million** essays to distinguish between human and AI-generated text with **95% accuracy**.
